Tools: Jira, Figma, Git/GitHub, Claude, Vercel

Strategy & Execution: Stakeholder Management, Cross-functional Leadership, Agile/Scrum, Data-driven Decision Making, Communication, Prioritization

EXPERIENCE

Times Internet | Product Consultant

Mar 2026 – Present

- **Led Regional App Product & Growth:** Served as the **primary Product SPOC** for 6+ regional-language apps while also owning the **0→1 product launch of Quickie by NBT**, a Gen-Z focused digital news platform, driving product strategy, distribution, acquisition, engagement and monetization initiatives end-to-end, from feature planning and launch execution to experimentation and performance analysis.
- **Scaled Web-to-app Acquisition:** Drove **WTA and app acquisition initiatives** across MWeb, AMP and app surfaces, optimizing floating CTAs, bottom-navigation placements, App Exclusive nudges and deep-link journeys using GA4, Singular. **WTA + organic channels contributed ~30% of total MAU**, while App Exclusive initiatives delivered **35% D1 retention and around 14-minute average session duration**, strengthening app acquisition and engagement.
- **Drove Data-Led Growth and Monetization Initiatives:** Led experimentation across **WTA placements, notification strategy, promotional nudges, ASO and advertising infrastructure**, using product analytics to drive portfolio-level decisions. Contributed to **~25% growth in monthly app revenue**, while coordinating execution across Product, Engineering, Analytics, Editorial and external partners.

Times Internet | Product Management Intern

Apr 2025 – Feb 2026

- **Owned Regional App Growth:** Worked across Product, Growth, Analytics & Monetisation for TIL's regional-language app portfolio, contributing to 6+ apps including Navbharat Times, NewsPoint, Marathi Times, Vijay Karnataka, Tamil and Malayalam.
- **Product Revamp and User Migration Strategy:** Played a key role in the 0→1 UX revamp of the Newspoint app, contributing to feature planning, UX decisions, QA, and launch coordination. Successfully migrated **62%** of legacy users to the new app version using force updates, push notifications, and in-app messaging.
- **Game Launches and Engagement-Led Product Expansion:** Drove the launch of 3 native games (Sudoku, Connect, Loop the Loop) on NBT Android and iOS, managing the complete release cycle from concept to post-launch optimization. Additionally, created POCs for upcoming games like Codele and MindMaze, strengthening the platform's casual gaming strategy.

PROJECTS

Raah Sakhi [GitHub Link](#) | Flutter · Dart · Firebase · Google Maps API · Figma

May 2026

- **Conceptualised and built RaahSakhi**, a women-centric micro-mobility and safety platform for Delhi, addressing last-mile mobility, safety and accessibility challenges through a technology-driven solution.
- Conducted **user research, competitive analysis and problem validation**, translating identified pain points into product requirements, user journeys, feature prioritisation and the overall MVP roadmap.
- **Designed and developed the MVP**, implementing core product flows and functionality while simultaneously owning the **product strategy, UX and technical execution** from problem discovery through prototype development.
